## PROFILE

As a Backend Developer with experience at Global-BI.S.A.S, I am skilled in Node.js, Git, .NET, Spring Boot, and SQL databases, also i have experience working with Angular, React, and Agile Methodologies. I am currently pursuing a degree in Computer Science (Informatic Engineering) at Universidad Autónoma de occidente. My future goal is to become a digital nomad, working remotely and continuously learning new technologies, particularly in data processing, AI, and IoT.

## EMPLOYMENT HISTORY

May 2023 — Nov 2023

### Full Stack Developer, Global-BI.S.A.S

Worked as a full stack developer, utilizing skills in Git, .NET, SQL, TypeScript, and Angular. Collaborated with a team of developers to design and implement software solutions for a client. Followed Agile methodologies to ensure efficient project delivery.

## EDUCATION

Aug 2020 — Nov 2024

### Computer Science (Informatic Engineering), Universidad Autónoma de occidente

Apr 2023 — Oct 2023

### Formación JAVA Y SPRING BOOT G5 - ONE, Oracle Next Education

## PROJECTS

Aug 2023 — Nov 2023

### Fast Task MERN project

I collaborated with my university peers on a task and project management project, where we applied agile methodology and best programming practices. Through various development stages, from design to testing and deployment, we implemented the MERN stack (MongoDB, Express.js, React.js, and Node.js). This process was guided by Professor Brayan's mentorship, enriching our experience and ensuring an efficient and effective project development.

Jul 2023 — Aug 2023

### Challenge One Alura Hotel

Challenge for creating a reservation system for Hotel Alura, offered by the Oracle One Program in collaboration with Alura Latin America.

Nov 2023 — Nov 2023

### Decentralice chat app

Collaborated with university peers to develop a decentralized chat application using Next.js for the front end and an Express server with Gun.js for message management. Successfully hosted on Vercel and Heroku.
